

bulkTANK

MONITORING

Bulk Tank Monitoring lets you check Kemin product levels in multiple tanks, across multiple sites, all from your computer or smartphone for real-time access.

The best-in-class technology provides accurate and repeatable level readings. The data is visualized in smart dashboards to optimize on-time deliveries, reduce costs, improve efficiency, and create peace of mind.

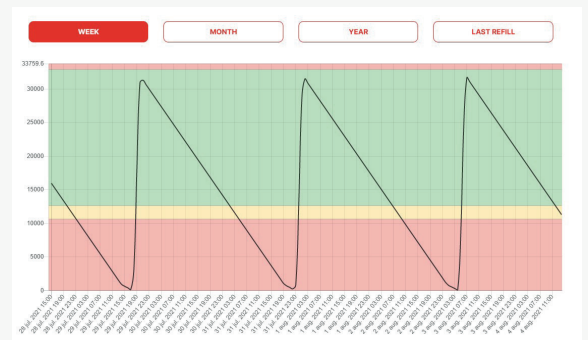

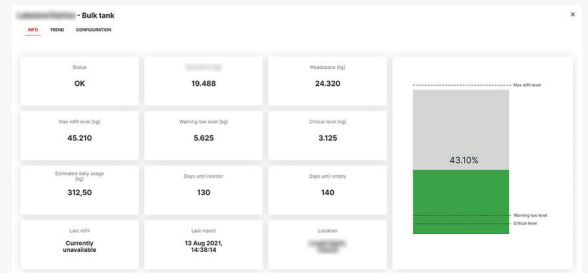

BENEFITS

- Delivery efficiency
- Increased safety
- Inventory management
- Forecast-predictive ordering and consumption
- Cost saving
- Peace of mind

FEATURES

- **Critical Warnings and Alerts**
Automatically sends e-mail or text message alerts to preselected users, based on tank configuration and role based access
- **Geo mapping**
Bulk tanks are displayed on a map to assist
- **Tank status at a glance**
Visualizes tank KPIs via smart dashboard
- **Reporting and trending**
Data is stored for 1 year and can easily be accessed
